HEURISTIC ANALYSIS   --FINDINGS

- Without a coded backend, some heuristics don't apply

- Passes most of the heuristics fine

- Room to Improve:
  - Consistency   – Modern iOS UI package for Adobe XD not yet available, ideal to match platform icons

  - User Freedom   – Let users backpedal on previous hangout "Yes/No"

  - Error Prevention   – Confimation alert before logging out

  - Standards   – Do we even need to log-in on phones? Keep everything local?
